### 4. FIRST AID MEASURES

**Inhalation:** Move to fresh air. If irritation or other symptoms occurs, get medical attention.

**Skin contact:** No first aid should be needed.

**Eye contact:** Immediately flush eyes with cool running water, lifting upper and lower lids. If irritation persists or for foreign body in the eye, get medical attention.

**Ingestion:** If large amount of material is swallowed, get immediate medical attention.

**Most Important symptoms and effects, both acute and delayed:** Eye contact may cause mechanical irritation and possible eye injury. May cause mechanical skin and respiratory irritation.

**Indication of any immediate medical attention and special treatment needed:** No immediate medical attention is required.

### 5. FIREFIGHTING MEASURES

**Suitable Extinguishing Media:** Use media that is appropriate for surrounding fire; unused product is not combustible.

**Specific Hazards Arising from the Chemical:** No specific hazards are known.

**Special Protective Equipment and Precautions for Fire-fighters:** Firefighters should always wear self-contained breathing apparatus and full protective clothing for fires involving chemicals or in confined spaces.

### 6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment, and Emergency Procedures:** No special equipment is generally required for spill clean-up. For dusty conditions, an approved respirator may be needed. Refer to Section 8 for additional information.

**Environmental Hazards:** Report releases as required by local and federal regulations.

**Methods and Materials for Containment and Cleaning Up:** Sweep up and collect unused material for disposal. For dusty conditions, an approved respiratory may be needed. Refer to Section 8 for additional information.

## 7. HANDLING AND STORAGE

**Precautions for Safe Handling:** Avoid breathing dust. Avoid contact with eyes, skin, and clothing. Wash thoroughly with soap and water after use. If clothing becomes dusty, launder before re-use. Use only with adequate ventilation. Minimize the generation and accumulation of dust. Follow good housekeeping practices to keep surfaces, including areas overhead such as piping, drop ceilings, ductwork, etc. free from settled dust. Dry powders can build static electricity charges when subjected to friction of transfer and in mixing operations.

**Conditions for Safe Storage, including any Incompatibilities:** Store in a dry area. Keep away from turpentine, hydrofluoric acid, vegetable oil, and other unsaturated organic compounds (such as fish oil), as this may generate heat and/or fire.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limit(s)

Chemical Name	Exposure limit(s)
Bentonite	15 mg/m <sup>3</sup> (total dust) TWA OSHA PEL 5 mg/m <sup>3</sup> (respirable dust) TWA OSHA PEL

**Appropriate Engineering Controls:** General ventilation is adequate for normal use. If handling produces airborne dust, local exhaust ventilation may be needed.

**Individual Protection Measures, such as Personal Protective Equipment:**

**Eye Protection:** Safety goggles if needed to prevent eye contact.

**Skin Protection:** No special skin protection needed for normal use.

**Respiratory Protection:** No respiratory protection required for normal use. For operations where the dust concentration may be excessive, a dust respirator may be used. Follow OSHA regulations in the selection and use of respiratory protection.
